More to discover.

Info

Watch how Grand Highlander makes every journey as fun and easy as possible.

Pre-Collision System With Pedestrian Detection

The Pre-Collision System with Pedestrian Detection (PCS w/PD) * is designed to help detect a vehicle, pedestrian, bicyclist or motorcyclist and provide an audio/visual forward-collision warning under certain circumstances. If you don't react, the system is designed to provide automatic emergency braking.

[Learn More >](#)

Full-Speed Range Dynamic Radar Cruise Control

Intended for highway use, Full-Speed Range Dynamic Radar Cruise Control (DRCC) * is an adaptive cruise control system that is designed to be set at speeds above 20 mph. The system uses vehicle-to-vehicle distance control to help maintain a preset distance from the vehicle ahead of you with enhancements that provide natural speed transitions during changing traffic conditions.

[Learn More >](#)

Lane Departure Alert With Steering Assist

When white/yellow lane markings or certain road-edge boundaries are detected at speeds above 30 mph, Lane Departure Alert with Steering Assist (LDA w/SA) * is designed to issue an audio/visual lane departure warning if an inadvertent lane departure is detected. If the driver does not take corrective action, the system is also designed to provide gentle corrective steering for lane-keeping assistance.

[Learn More >](#)

Lane Tracing Assist

When Full-Speed Range Dynamic Radar Cruise Control (DRCC) * is enabled and lane markers are detected, Lane Tracing Assist (LTA) * uses the lines on the road and/or preceding vehicles to provide active driving assistance and help keep the vehicle centered in its lane. While LTA is activated, the Emergency Driving Stop System (EDSS) * is designed to help detect a driver who is inattentive or nonresponsive, such as during a medical emergency. This feature can bring the vehicle to a stop if the driver does not respond to alerts to take control.

[Learn More >](#)

Road Sign Assist

Using an intelligent camera, Road Sign Assist (RSA) * detects stop signs, Do Not Enter signs, yield signs and other traffic signs. When detected, the sign is displayed on the Multi-Information Display (MID).
