Drive change with every charge.

Discover what makes bZ4X stand out.

[Build Your bZ4X](#)

Charging time depends on the type of charger you're using.

Level 3: DC Fast Charging

Under ideal conditions, you can charge from Low Battery Light to 80% in as quickly as ~30 minutes (FWD) or ~35 minutes (AWD) with charging that equates to approximately 6 miles per minute (FWD) and 5 miles per minute (AWD).^{***} Currently only available at public charging stations. ^{*}

Level 2: 240-Volt

Level 1: 120-Volt

Set up your at-home charging station.

bZ4X comes with a portable dual-voltage charging cable,^{*} making at-home Level 2 charging easier. Additional at-home Level 2 charging solutions are available. Available resources such as Qmerit can help you locate an electrician to install the appropriate 240V outlet, while ChargePoint[®] offers additional home charger options.

[Explore ChargePoint[®]](#) > [Explore Qmerit](#) >

Pull up, plug in and charge up.

Enjoy charging on the go with over 55,000 public stations offering Level 2 and DC Fast Charging.
^{***} Plus, get a year of complimentary charging ^{*} at EVgo stations when you purchase/lease a new 2024 bZ4X.

Vehicle Benefits

ToyotaCare

Enjoy a no cost maintenance plan that covers normal factory scheduled service for 2 years or 25,000 miles, whichever comes first, and extended 24-hour Roadside Assistance for 3 years, unlimited mileage. *

Environmental Benefits

Reducing CO₂ emissions by going fully electric is one way we can lessen our impact on the environment. And through the complimentary Clean Assist program, * bZ4X owners can offset their vehicle charging with 100% renewable energy.

Potential Savings

All-electric vehicles can bring about potential state incentives. * Preliminary expectations include a lower cost of ownership, including overall service and maintenance costs.

Pre-Collision System With Pedestrian Detection

Pre-Collision System with Pedestrian Detection (PCS w/PD) [†] is designed to help detect a vehicle, pedestrian, bicyclist or motorcyclist and provide an audio/visual forward-collision warning under certain circumstances. If you don't react, the system is designed to provide automatic emergency braking.

[Learn More >](#)

Full-Speed Range Dynamic Radar Cruise Control

Intended for highway use, Full-Speed Range Dynamic Radar Cruise Control (DRCC) [†] is an adaptive cruise control system that is designed to be set at speeds above 20 mph, and uses vehicle-to-vehicle distance control to help maintain a preset distance from the vehicle ahead of you.

[Learn More >](#)

Lane Departure Alert With Steering Assist

When white/yellow lane markings or certain road-edge boundary lines are detected at speeds above 30 mph, Lane Departure Alert with Steering Assist (LDA w/SA) [†] is designed to issue an audio/visual lane departure warning if an inadvertent lane departure is detected. If the driver does not take corrective action, the system is also designed to provide gentle corrective steering for lane-keeping assistance.

[Learn More >](#)

Lane Tracing Assist

When Full-Speed Range Dynamic Radar Cruise Control (DRCC) [†] is enabled and lane markers are detected, Lane Tracing Assist (LTA) [†] uses the lines on the road and/or preceding vehicles to help keep the vehicle centered in its lane. While LTA is activated, the Emergency Driving Stop System (EDSS) [†] is designed to monitor the driver's inputs, such as steering operation. If the EDSS determines the driver is not attentive and the driver does not respond to prompts to resume control of the vehicle, it can bring the vehicle to a stop under certain conditions.

[Learn More >](#)

Road Sign Assist

Using an intelligent camera, Road Sign Assist (RSA) [†] detects stop signs, Do Not Enter signs, yield signs and the sign on the Multi-Information Display. When RSA is activated, the system will provide an audio/visual alert if you approach a stop sign, Do Not Enter sign, yield sign or the sign on the Multi-Information Display.

BEYOND ZERO

Beyond Zero is our vision to reach carbon neutrality with our products, services and operations, and go beyond, as we find new ways to create a better world. The All-Electric BEV bZ4X is one of the many ways we are reducing carbon emissions to drive toward our Beyond Zero vision.

Battery EV

bZ4X is a part of the electrified family.

We currently offer more low and zero emission vehicles combined than any other automaker, to give customers numerous choices to help reduce their carbon footprint.

The Power Of Choice

Our lineup brings you more than just your choice of electrified powertrains: Hybrid EV, Plug-in Hybrid EV, Battery EV and Fuel Cell EV. Whatever you're looking for in a ride—size, style, efficiency, speed—there's a vehicle to suit your lifestyle that allows you to put more electrified miles on the road.
