LEARN MORE ABOUT MIRAI

How Does It Create Electricity?

At the core of Mirai, hydrogen from the fuel tank and air entering from the intake grille meet in the Fuel Cell Stack. There, a chemical reaction involving the oxygen in the air and hydrogen creates electricity—powering Mirai. In the end, the only by-product is water.

How Do I Fill Up Mirai?

How Safe Is Hydrogen?

How Much Does It Cost?

What is a Fuel Cell Electric Vehicle?

Pre-Collision System With Pedestrian Detection

Pre-Collision System with Pedestrian Detection (PCS w/PD) * is designed to help detect a vehicle, bicyclist or motorcyclist and provide an audio/visual forward-collision warning under certain circumstances. If you don't react, the system is designed to provide automatic emergency braking.

[Learn More >](#)

Full-Speed Range Dynamic Radar Cruise Control

Intended for highway use, Full-Speed Range Dynamic Radar Cruise Control (DRCC) * is an adaptive cruise control system that is designed to be set at speeds above 20 mph and uses vehicle-to-vehicle distance control to help maintain a preset distance from the vehicle ahead of you.

[Learn More >](#)

Lane Departure Alert With Steering Assist

When white/yellow lane markings or certain road-edge boundary lines are detected at speeds above 30 mph, Lane Departure Alert with Steering Assist (LDA w/SA) * is designed to issue an audio/visual lane departure warning if an inadvertent lane departure is detected. If the driver does not take corrective action, the system is also designed to provide gentle corrective steering for lane-keeping assistance.

[Learn More >](#)

Lane Tracing Assist

When Full-Speed Range Dynamic Radar Cruise Control (DRCC) * is enabled and lane markers are detected, Lane Tracing Assist (LTA) * uses the lines on the road and/or preceding vehicles to provide active driving assistance and help keep the vehicle centered in its lane. While LTA is activated, the Emergency Driving Stop System (EDSS) * is designed to monitor the driver's inputs, such as steering operation. If the EDSS determines the driver is not attentive and the driver does not respond to prompts to resume control of the vehicle, it can bring the vehicle to a stop under certain conditions.

 BEYOND ZERO

Beyond Zero is our vision to reach carbon neutrality with our products, services and operations, and go beyond, as we find new ways to create a better world. The Fuel Cell EV Mirai is one of the many ways we are reducing carbon emissions to drive toward our Beyond Zero vision.

 Fuel Cell EV

Mirai is a part of the Fuel Cell EV Family

We currently offer more low and zero emission vehicles combined than any other automaker, to give customers numerous choices to reduce their carbon footprint.

The Power of Choice

Our lineup brings you more than just your choice of electrified powertrains: Hybrid EV, Plug-in Hybrid EV, Battery EV and Fuel Cell EV. Whatever you're looking for in a ride—size, style, efficiency, speed—there's a vehicle to suit your lifestyle that allows you to put more electrified miles on the road.
